B TECH (SEM-V) THEORY EXAMINATION 2020-21 **DATA ANALYTICS**

Time: 3 Hours Total Marks: 100

Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt all questions in brief.

 $2 \times 10 = 20$

| Q no. | Question | Marks | СО |
|-------|--|-------|----|
| a. | What are the different types of data? | 2 | 1 |
| b. | Explain decision tree. | 2 | 1 |
| c. | Give the full form of RTAP. | 2 | 3 |
| d. | List various phases of data analytics lifecycle. | 2 | 1 |
| e. | Explain the role of Name Node in Hadoop. | 2 | 5 |
| f. | Discuss heartbeat in HDFS. | 2 | 5 |
| g. | Differentiate between an RDBMS and Hadoop. | 2 | 5 |
| h. | Write names of two visualization tools. | 2 | 4 |
| i. | How can you deal with uncertainty? | 2 | 3 |
| j. | Data sampling is very crucial for data analytics. Justify the statement. | 2 | 3 |

SECTION B

2. Attempt any three of the following:

| Q no. | Question | Marks | СО |
|-------|---|-------|----|
| a. | Explain K-Means algorithms. When would you use k means? State weather the statement "K-Means has an assumption each cluster has a roughly equal number of observations" is true or false. Justify your answer | 10 | 4 |
| b. | Illustrate and explain the steps involved in Bayesian data analysis. | 10 | 2 |
| c. | Suppose that A, B, C, D, E and F are all items. For a particular support threshold, the maximal frequent item sets are {A, B, C} an {D, E}. What is the negative border? | 10 | 1 |
| d. | Discuss any two techniques used for multivariate analysis. | 10 | 2 |
| e. | Design and explain the architecture of data stream model. | 10 | 3 |

SECTION C

3. Attempt any one part of the following:

| Q no. | Question | Marks | CO |
|-------|--|-------|----|
| a. | Describe the architecture of HIVE with its features. | 10 | 5 |
| b. | Brief about the main components of MapReduce | 10 | 5 |

4. Attempt any one part of the following:

| Q no. | Question | Marks | CO |
|-------|---|-------|----|
| a. | Describe any two data sampling techniques. | 10 | 1 |
| b. | Explain any one algorithm to count number of distinct elements in a | 10 | 3 |
| | Data stream. | | |

Subject Code: KCS051

Roll No:

5. Attempt any *one* part of the following:

| Q no. | Question | Marks | CO |
|-------|---|-------|----|
| a. | Brief about the working of CLIQUE algorithm. | 10 | 4 |
| b. | Cluster the following eight points (with (x, y) representing locations) | 10 | 4 |
| | into three clusters: A1(2, 10), A2(2, 5), A3(8, 4), A4(5, 8), A5(7, 5), | | |
| | A6(6, 4), A7(1, 2), A8(4, 9) | | |
| | Initial cluster centers are A1(2, 10), A4(5, 8) and A7(1, 2). The | | |
| | distance function between two points $a = (x1, y1)$ and $b = (x2, y2)$ is | | |
| | defined as- P (a, b) = $ x2 - x1 + y2 - y1 $ | | |
| | Use K-Means Algorithm to find the three cluster centers after the | | |
| | second iteration | | |

6. Attempt any *one* part of the following:

| Q no. | Question | Marks | CO |
|-------|--|-------|----|
| a. | What is prediction error? State and explain the prediction error in | 10 | 4 |
| | regression and classification with suitable example. | | |
| b. | Given data = {2, 3, 4, 5, 6, 7; 1, 5, 3, 6, 7, 8}. Compute the principal | 10 | 2 |
| | component using PCA Algorithm. | | |

7. Attempt any *one* part of the following:

| Q no. | Question | Marks | СО |
|-------|---|-------|----|
| a. | Develop and explain the data analytics life cycle | 10 | 1 |
| b. | Distinguish between supervised and unsupervised learning with | 10 | 1 |
| | example. | | |
